

Ludgvan Neighbourhood Plan - Local Green Space

Purpose of Report

1. This report assesses the merit of various sites nominated for inclusion in the Neighbourhood Plan as local green space, to be subject to Policy LUD6 in the Plan.

Legislation

2. The NPPF gives parish councils the right to designate small local recreation and amenity areas that are of “*particular importance to the community*” as ‘local green spaces’ and give them protection in the Neighbourhood Plan. The NPPF states that the green space should be:
 - *in reasonably close proximity to the community it serves;*
 - *is demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and*
 - *is local in character and is not an extensive tract of land.*
3. In addition to these criteria, Planning Practice Guidance (PPG) states: “*Local Green Space designation will rarely be appropriate where the land has planning permission for development. Exceptions could be where the development would be compatible with the reasons for designation or where planning permission is no longer capable of being implemented*”¹.
4. Other designations of land, such as green belt or conservation area status, do not necessarily preclude or support designation as local green space. But it is necessary to consider whether the additional designation is necessary and would serve a useful purpose.

Candidate Sites

5. The list of candidates for assessment as local green space was arrived at by a task group appointed by the Ludgvan Neighbourhood Plan Steering Group. The task group used their extensive local knowledge and applied an agreed interpretation of the criteria of the NPPF. Thirteen sites were identified as potential candidates for designation of a local green space. For each site an appraisal form was completed.

Appraisal and Conclusions

6. Each of the selected sites has been subject to a survey and assessment. The results of this ‘work’, carried out in May/June 2018, is set out in a schedule for each site which can be found in Appendix A to this report (along with a site location map in Appendix B). We have used the information contained on these schedules to consider whether each of the sites meets sufficient of the criteria demanded by the NPPF to merit a ‘Local Green Space’ (LGS) designation.
7. The NPPF is quite stringent and specific in its criteria relating to LGS designation. It states that “*designation will not be appropriate for most green areas or open space*” (para. 77). There is now a significance body of ‘evidence’ of how the criteria are being interpreted by examiners of neighbourhood plans. Some of the criteria have also been tested subsequently in law.
8. As regards it being an **extensive tract** of land, the PPG states that there is no hard and fast rule about the size of a local green space. It is a judgment call therefore. But the PPG goes on to emphasise that an LGS designation should only be used where “*the green area is not an extensive tract of land*”. There is a no set maximum nor minimum size limit, but the site must be ‘local’ in character. The PPG also states that the blanket designation of open countryside adjacent to settlements will not be appropriate, particularly if designation is being used in a way that undermines the aim of plan-making i.e. identify sufficient land in suitable locations to meet identified development needs.

¹ PPG Paragraph: 008 Reference ID: 37-008-20140306 <https://www.gov.uk/guidance/open-space-sports-and-recreation-facilities-public-rights-of-way-and-local-green-space#Local-Green-Space-designation>

9. It is generally acknowledged that the application of criteria may differ between settlements depending on their physical size and population. Designated spaces should normally be fairly contained, with clearly defined edges. In applying this criterion to potential local green space in Ludgvan Parish, we asked:
- does the space or combination of adjoining spaces ‘feel’ local in character and scale, in respect of the local community that the space serves?
 - Is the proposed space larger than other areas of land in the vicinity?
 - Is it contained with clearly defined edges?
 - Does the space connect physically, visually and socially to the local area?
10. As for being in proximity to the community it serves, we are advised to apply the **reasonably close** test, which is another judgment call. If public access is a key factor influencing its consideration, the site should normally be within easy walking distance of the community it serves. This may vary depending on the size of the community to which the green space relates, the size of the green space or the value placed on it by the community. The land must not be isolated from the community. Some councils have introduced a maximum distance between the space and the community. For instance, Leicester has stated it must be within 400 metres, Central Bedfordshire, within 600 metres.
11. The third test that needs to be applied is whether the site is **demonstrably special** to the local community and holds a particular **local significance**. The examples given in the NPPF are: *“because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife”*. We have looked for a clear indication that the community cares about the future of the space as a facility or amenity for the community to enjoy. We have been cognisant too of the PPG’s advice that, how a local green space will be *“managed in the future is an important consideration, if the features that make it special or locally significant are to be conserved”*.
12. The table below has been produced as a means of summarises the assessment findings as they relate to the criteria in the NPPF:

Ludgvan Local Green Space Analysis 2018

Recommendations

The draft policy LUD6 is worded as follows:

The areas listed below and identified on Map 5 are designated as Local Green Spaces where new development is ruled out other than in very special circumstances:

Based on the surveys and assessments, we make the following recommendations regarding local sites being designated as local green space and therefore subject to policy LUD6 in the Ludgvan Neighbourhood Plan:

	Candidate Site	Recommendation	Reason
1	Allotments, Church Hill	Reject	Extensive area of allotments serving wider community, better served by allotments policy in the NP ²
2	Allotments, Long Rock	Reject	Serves wider than local community, better served by allotments policy in the NP
3	Ludgvan Playing Fields	Reject	Extensive area used for organised sport. Better served by separate recreation site policy in NP
4	Play Area, Lower Quarter	Accept	Main local play area in the neighbourhood
5	Nature Reserve, Long Rock	Reject	Extensive area of land, ecologically important site that already has protection
6	Memorial Garden, Churchtown	Accept	Small amenity and memorial area that is enjoyed by community and visitors
7	Long Rock Playing Fields	Accept	A relatively small area of parkland with play area serving the local community
8	St Paul's Amenity Garden	Accept	Extensive area at a distance from the community
9	Crowlas Crossroads	Reject	Essentially, highway verges and sightlines
10	Old Village Green, Whitecross	Reject	No sign of community use or value in the recent past
11	Bowl Rock site	Reject	Remote ancient stone adjacent to layby, not a green site
12	Tolverth Field	Accept	Green space and buffer between houses and busy road and industrial estate
13	Canons Town Park	Accept	Only green play area in locality

PW/LudNP/Jun18

² Possible wording of a draft allotment/community horticulture policy:

"The use of redundant land for community allotments, orchards and composting initiatives in suitable locations and where viable will be considered favourably.

Proposals that would result in the loss of all or part of existing allotment spaces will not be supported unless alternative and equivalent allotment space is provided."
